

Storage Solutions for **Every** Industry

BULK STORAGE SYSTEMS

FORGE is an industry leader in dry bulk material storage solutions, offering the design, supply, and installation of dry bulk systems and silos. We custom engineer our bulk storage tank solutions to meet the exact needs of your project and according to recommended designs standards, such as IBC, UBC, and ASCE.

We work with you to develop a system of the highest quality, no matter the size or scope of your project, from small transportable storage tanks to large bulk storage plants. We also offer pre-engineered, standard-size silos for historically common project capacities.

Storage Solutions for **Every** Industry

BULK STORAGE SYSTEMS

Delivering quality in bulk

FORGE bolted steel silos are manufactured using the highest quality steel and design. We use thermoset powder epoxy for the interior and exterior that's formulated for corrosion and high-abrasion resistance even the most aggressive bulk material environments.

Our storage solutions are built for a wide variety of dry bulk materials, including:

- Frac sand
- Chemical/mineral (aggregate, calcium)
- Plastics (PET pellets)
- Cement (fluidized, fly ash)
- Coal
- Lime (slurry/slake)
- Woodchips
- Carbon black
- Food products
- Sawdust
- Agricultural (grain/seeds, fertilizer, feed stock)

Built to carry the weight

FORGE dry bulk silos are designed and engineered to perform with any process or auxiliary equipment required for your system performance. **FORGE** silos are constructed for long-term industrial use in environments where little maintenance is required or allowed.

- Various hopper slope designs available to accommodate tough or free-flowing products
- Modular design allows for site-restricted installations and challenging site configurations
- Truck-drive-through and flat-bottom designs with specialized unloaders available
- Silos can be designed with a capacity of over 100,000 cubic feet
- Sawdust
- Agricultural (grain/seeds, fertilizer, feed stock)

FORGE service = best in class

With **FORGE**, you can rest assured that it's our crew and only our crew at your project site –**FORGE** certified and **FORGE** trained with no exceptions. Our crew also utilizes jack systems for installation to help ensure the safety of our team and the smooth completion of your project.
